

Software & Hardware Package

The NControl MC (Master Control) Software & Hardware package expands on the convenience and efficiency of the other NVerzion packages by offering access to your master control panel and graphics-related tools. A traditional master control will typically include effects, transitions and other features that can enhance the on-screen presentation. The NVerzion MC package includes controls to enhance these abilities, plus it can additionally support character generators, downstream keyers, and more.

Shown are examples of NGet, NControlMC, NBase, EMC-R and NView applications

Add as many channels as you like. Add monitoring and control software anywhere and expand your operation without limitation.

- Can the system be tailored for a station's individual needs? Yes. The software architecture is designed to accept specific customer modifications.
- What is the maximum number of devices a system can expand to? Is the physical location of devices important? There is virtually no limitation on the number of devices OR on where they can be located.
- Is the system extensible? Yes. The package can be expanded to any number of dubbing channels, playout channels, archives, etc. Additional capabilities can also easily be added, such as central casting, dish control, and asset management.
- What kind of devices can this package control? The system uses VDCP to control video servers and is server agnostic. The system also supports a variety of tape machines. Optional controls can be added for more device control.

Package Includes

- NGet - Dub-station software
 - Transfers frame-accurate content from one source to a record destination. Also supports backup devices
- NPoint - Preparation
 - Provides reviewing, segmenting, and trimming
- NControl MC – Playlist software for Master Control switcher
- NBase-SQL - Media Database Manager
 - Maintains local database of server clips and tapes
 - Communicates changes between applications
- NView - Media Database Viewer
 - Operator can view, filter, sort, edit database fields
- NConvert – traffic/scheduling conversion software
- EMC - Ethernet Machine Control and Router Control
 - Configurable control for up to 8 serial devices
- Computer System
 - 2RU rack mount chassis
 - Intel Dual Core processor, Windows 10 Pro
 - 8-port PCI 422 serial card
 - Note: Keyboard, monitor, mouse are not included
- Includes 1 year of customer support and warranty
