Destination Path: M:\Media\ DVD Source Path: D:\VIDEO\_TS\ VidExt: .m2v AudExt: .aiff DestExt: .mov BitRate: 16

The windows above show the default values and are set in the configuration window.

The Destination Clip Name is used by the DVD and the 'Copy Use Name' functions. This is the name the Media will be called when it is copied to the server.

Destination Clip Name: REED

The button below will copy the information on the inserted DVD and 'Rip' it to the server giving it the name specified in the Destination Clip Name.

DVD

The button below will copy the selected file to the server but change the name to the name specified in the Destination Clip Name.

Copy Change Name

The button below will copy the selected file to server and use the same name.

Copy Same Name
